## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 15, 2006 has been entered.

### ***Status of Claims***

This application has been transferred from a prior examiner to the instant Examiner. Claims 1 and 6 were amended in the communication filed on May 10, 2006. Claims 1-10 and 24 remain pending and presented for examination on the merits.

### ***Response to Arguments***

Applicant's arguments with respect to claim 1-10 and 24 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC §102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-10 and 24, as understood by the Examiner, are rejected under 35**

**U.S.C. §102(e) as being anticipated by Dickson (U.S. 7,082,406 B1).**

Dickson discloses automatically identifying without reliance on user action, a selected aspect of information regarding the electronic transaction (e.g. receipt for fuel purchase, see Fig 10) in an electronic communication between the user-side (the customer gas pump/printer apparatus 12) and the supplier-side (the seller computing apparatus 14); generating a print request (performed automatically, see Fig 9 and associated text); sending said print request to a printing apparatus (to printer of pump device 12, see Fig 6 and associated text); printing information regarding the electronic transaction in response to the print request (the customer's receipt is printed, see Fig 10); notifying a control apparatus of communication between the user-side and supplier-side (see column 2, lines 20-column 4, line 30; column 4, line 60-column 5, line 5 describing customer identification).

*Although the Examiner has pointed out particular references contained in the prior art(s) of record in the body of this action, the specified citations are merely representative of the teachings in the art as applied to the specific limitations within the individual claim. Since other passages and figures may apply to the claimed invention as well, it is respectfully requested that the applicant, in preparing the response, to consider fully the entire references as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior arts or disclosed by the examiner.*
